

Country Zones and Age Groups

Armenia	①
Belgium	②
Spain	③
United Kingdom	④

Due to the fact that, on an international level, costs for medical treatments vary from country to country and the average claims ratio of a group of insured persons increases with age, the **EXPAT INFINITY** product provides for four country zones and insurance premium rates split by age groups. This allows us to offer our customers the utmost level of fairness with respect to the amount of insurance premiums in accordance with their living conditions.

Deductible

The options available with respect to the amount of the deductible shall be EUR 0, EUR 250, EUR 500 and EUR 1,000 per Insured Person and insurance year.

Risk Markups

In the event of particularly severe previous illnesses or chronic diseases, private insurers are frequently not in a position to offer coverage to the applicant concerned. In order to provide coverage for customers with pre-existing diseases, BDAE introduced risk markups for the **EXPAT INFINITY** product. Such markups will be added to the insurance premium and differ depending on the state of health.

Prospective Entitlement

As only international health insurance tariff in Germany, **EXPAT INFINITY** offers the possibility to subscribe for a prospective entitlement. Everybody who has not yet definitely decided whether he or she really wants to stay abroad in the long run or whether he or she might have the wish to stay in Germany for a while from time to time, will now, with **EXPAT INFINITY**, be able to "put off" his or her examined state of health. Sometime in future, when the prospective entitlement is changed to become the **EXPAT INFINITY** active insurance coverage, this status will not be queried again.
